

Exhibitor Brochure

POSTPONED TO 1-3 December 2020
Tokyo Ryutsu Center (TRC)

Notice about Wireless Japan 2020

The new coronavirus infection, which had been a concern since the beginning of the year, has developed into a global pandemic, and the Governor of Tokyo again sent a request for voluntary restraint of the event.

As a result, we decided that it would be difficult to hold the Wireless Japan 2020 in May. We sincerely apologize to all of you who have been preparing for the exhibition so far and those who have considered visiting the exhibition.

As announced previously, Wireless Japan 2020 will be rescheduled to December 1-3, 2020 and its venue will be Tokyo Ryutsu Center.

We would appreciate your understanding and continuous support.

◆In special cooperation with: Mobile Computing Promotion Consortium, Mobile Content Forum, Bluetooth SPECIAL INTEREST GROUP, New Generation M2M Consortium

◆Concurrent expos: Wireless Technology Park(WTP)2020, Transport System Expo 2020

EXPO COMM Wireless Japan 2020 will take place based on a theme that highlights 2 of the rising network technologies of the moment - 5G systems in the works for commercialization in 2020 and IoT (Internet of Things) services that are set to make a sea change in society and industry.

The pillar of the event focuses on “mobile infrastructure and edge computing” and “industrial use, LPWA, short-distance wireless communication, and security” for 5G and IoT respectively.

It is the best place for business networking such as finding potential clients, creating new sales opportunities, and getting connected with better material suppliers, etc.

Exhibitors

IoT systems

LPWA (LoRa, SIGFOX, FlexNet, NB-IoT...), Wireless LAN, Wireless Ban/Pan, Bluetooth, Bluetooth Low Energy (BLE), ZigBee, Wi-SUN, Z-wave, DECT, Transfer Jet, RFID, NFC, ANT+, DECT/ULE standards compliant devices, Gateway for IoT/Platform/Security/System integration, AI/Data analysis, Wearable devices, job-oriented terminal, Handy terminal, etc.

Digital infrastructure

Solutions for network operators (5G, antenna, SDN/NFV, router, switch, beam transmission device, measuring instrument, network investment, surveillance, power supply, storage battery, etc.)

Attendees

Manufacturers

Logistics providers

Retailers

Medical-related businesses

Public and private sectors

Financial and insurance experts

Software developers

System integrators

Semiconductor manufacturers

Telecommunication carriers

Communication equipment/device manufacturers

Wholesalers and IM/EX companies

Home electronics · precision equipment manufacturers
